Week 7: SQL Operations and Reports for E-Commerce Database

Scenario

An online shopping company stores details about customers, products, orders, payments, and stock in a database. The company uses SQL queries to find required information, check product availability, and track customer orders. This practical work helps students understand how to retrieve and manage database information using different SQL commands.

1. Display all customer records.

```
SQL> SELECT*FROM CUSTOMER;

CUSTOMER_ID FIRST_NAME                                         LAST_NAME
----------- -------------------------------------------------- --------------------------------------------------
EMAIL                                                                                                PHONE           CREATED_A
---------------------------------------------------------------------------------------------------- --------------- ---------
          1 Arun                                               Kumar
arun@gmail.com                                                                                       9000000001      01-AUG-26

          2 Meena                                              Ravi
meena@gmail.com                                                                                      9000000002      02-AUG-26

0008              8 25-OCT-26          800 SHIPPED
0007              7 20-OCT-26         5000 SHIPPED
0006              6 18-OCT-26         1200 PENDING
0005              5 12-OCT-26         1000 DELIVERED
0004              4 07-OCT-26         4000 DELIVERED
0003              3 04-OCT-26         3000 PENDING
0001              1 28-SEP-26         2800 DELIVERED
0002              2 25-SEP-26         1500 SHIPPED

10 rows selected.
```

4. Displaying Different Values Using DISTINCT

1. Show all different product categories.

```
SQL> SELECT DISTINCT Category_Name
  2  FROM Category;

CATEGORY_NAME
--------------------------------------------------
Footwear
Haircare
Makeup
Fashion
Skincare
```

2. Display the different payment methods.

```
SQL> SELECT DISTINCT PAYMENT_MODE FROM PAYMENT;

PAYMENT_MODE
--------------------
Net Banking
Card
Cash
UPI
```

5. Searching Products Using Conditions

1. Find products priced between ₹20,000 and ₹40,000.

```
SQL> SELECT * FROM Product
  2  WHERE Price BETWEEN 20000 AND 40000;

no rows selected
```

2. Display products from a selected category.

```
SQL> SELECT * FROM Product
  2  WHERE Category_ID = 'CAT005';

no rows selected
```

3. Show products that are available in stock.

```
SQL> SELECT * FROM Inventory
  2  WHERE Stock_Status = 'Available';

INVENTO PRODUCT SELLER_ STOCK_QUANTITY STOCK_STATUS         LAST_UPDA
------- ------- ------- -------------- -------------------- ---------
INV0001 P100001 S00001               4 Available            12-SEP-26
INV0002 P100001 S00002               3 Available            13-AUG-26
INV0004 P200002 S00004               3 Available            14-SEP-26
```

4. Search for a product by its name.

```
SQL> SELECT * FROM Product
  2  WHERE Product_Name = 'Power Bank';

no rows selected
```

5. Find products with a small stock quantity.

```
SQL> SELECT * FROM Inventory
  2  WHERE Stock_Quantity < 30;

INVENTO PRODUCT SELLER_ STOCK_QUANTITY STOCK_STATUS         LAST_UPDA
------- ------- ------- -------------- -------------------- ---------
INV0001 P100001 S00001               4 Available            12-SEP-26
INV0002 P100001 S00002               3 Available            13-AUG-26
INV0003 P100001 S00003               4 Unavailable          15-SEP-26
INV0004 P200002 S00004               3 Available            14-SEP-26
```

6. Retrieving Customer and Product Details

1. Display customer information along with their orders.

```
SQL> SELECT
  2      C.CUSTOMER_ID,
  3      C.FIRST_NAME || ' ' || C.LAST_NAME AS CUSTOMER_NAME,
  4      C.EMAIL,
  5      C.PHONE,
  6      O.ORDER_ID,
  7      O.ORDER_DATE,
  8      O.TOTAL_AMOUNT,
  9      O.ORDER_STATUS
 10  FROM CUSTOMER C
 11  JOIN ORDERS O
 12  ON C.CUSTOMER_ID = O.CUSTOMER_ID
 13  ORDER BY C.CUSTOMER_ID;

         2 Meena                                              Ravi                                               0002    Kids Shoes
        2       1500

         2 Meena                                              Ravi                                               0002    Laptop
        5      55000

         2 Meena                                              Ravi                                               0002    Kids Shoes
        4       1500

9 rows selected.
```

7. Using More Than One Condition

1. Find electronic products with prices above ₹10,000.

```
SQL> SELECT
  2       P.Product_ID,
  3       P.Product_Name,
  4       C.Category_Name,
  5       P.Price
  6  FROM Product P
  7  JOIN Category C
  8  ON P.Category_ID = C.Category_ID
  9  WHERE P.Price > 10000
 10  ORDER BY P.Price DESC;

no rows selected
```

2. Search for product names containing the word Mobile.

```
SQL> SELECT * FROM Product
  2  WHERE UPPER(Product_Name) LIKE '%MOBILE%';

no rows selected
```

3. Display orders placed between two dates.

```
SQL> SELECT * FROM Orders
  2  WHERE Order_Date BETWEEN
  3  DATE '2026-03-01' AND DATE '2026-06-30'
  4  ORDER BY Order_Date;

no rows selected
```

8. Creating Reports Using SQL

Report 1: Product Stock Report

Purpose: To check product prices, available quantities, and stock status.

```
SQL> SELECT
  2      Product_Name,
  3      Price,
  4      Stock_Quantity,
  5      CASE
  6          WHEN Stock_Quantity > 0 THEN 'Available'
  7          ELSE 'Out of Stock'
  8      END AS Availability
  9  FROM Product
 10  ORDER BY Product_Name;

PRODUCT_NAME              PRICE STOCK_QUANTITY AVAILABILITY
-------------------- ---------- -------------- ------------
Face Cream                  250             50 Available
Face Wash                   180             40 Available
Kids Shoes                   15              2 Available
Laptop                       20              1 Available
Lipstick                    350             30 Available
```

Report 2: Customer Registration Report

Purpose: To find the total number of customers and recently registered customers.

1. Count all customers.

```
SQL> SELECT COUNT(*) AS Total_Customers
  2  FROM Customer;

TOTAL_CUSTOMERS
---------------
             15
```

2. Display recently registered customers.

```
SQL> SELECT
  2      Customer_ID,
  3      First_Name || ' ' || Last_Name AS Customer_Name,
  4      Email,
  5      Created_At
  6  FROM Customer
  7  WHERE Created_At >= DATE '2026-01-01'
  8  AND Created_At < DATE '2027-01-01'
  9  ORDER BY Created_At DESC;

CUSTOMER_ID CUSTOMER_NAME
----------- ----------------------------------------------------------------------------------------------------
EMAIL                                                                                            CREATED_A

15 rows selected.
```

Report 3: Order Summary Report

Purpose: To check the total orders and their current status.

1. Find the total number of orders.

```
SQL> SELECT COUNT(*) AS Total_Orders
  2  FROM Orders;

TOTAL_ORDERS
------------
          10
```

2. Count delivered orders.

```
SQL> SELECT COUNT(*) AS COMPLETED_ORDERS FROM ORDERS WHERE ORDER_STATUS = 'DELIVERED';

COMPLETED_ORDERS
---------------
              4
```

3. Count pending orders.

```
SQL> SELECT COUNT(*) AS Pending_Orders
  2  FROM Orders
  3  WHERE Order_Status IN ('PENDING', 'SHIPPED');

PENDING_ORDERS
--------------
             6
```

4. Count cancelled orders.

```
SQL> SELECT COUNT(*) AS Cancelled_Orders
  2  FROM Orders
  3  WHERE Order_Status = 'Cancelled';

CANCELLED_ORDERS
----------------
               0
```

Report 4: Product Performance Report

Purpose: To identify expensive products, products with more customer reviews, and products available for purchase.

1. Display products from highest price to lowest price.

```
SQL> SELECT
  2      Product_ID,
  3      Product_Name,
  4      Price
  5  FROM Product
  6  ORDER BY Price DESC;

PRODUCT PRODUCT_NAME              PRICE
------- ------------------- ----------
P000004 Lipstick                   350
P000003 Face Cream                 250
P000005 Face Wash                  180
P100001 Laptop                      20
P200002 Kids Shoes                  15
```

2. Find products with the highest number of reviews.

```
SQL> SELECT
  2      P.PRODUCT_ID,
  3      P.PRODUCT_NAME,
  4      COUNT(R.REVIEWID) AS REVIEW_COUNT
  5  FROM PRODUCT P
  6  JOIN REVIEW R
  7  ON P.PRODUCT_ID = R.PRODUCTID
  8  GROUP BY P.PRODUCT_ID, P.PRODUCT_NAME
  9  ORDER BY REVIEW_COUNT DESC;

PRODUCT PRODUCT_NAME         REVIEW_COUNT
------- ------------------- ------------
P000003 Face Cream                      5
P000004 Lipstick                        3
P200002 Kids Shoes                      2
P100001 Laptop                          2
P000005 Face Wash                       1
```

3. Display products currently available for purchase.

```
SQL> SELECT *
  2  FROM Product
  3  WHERE Stock_Quantity > 0;

PRODUCT PRODUCT_NAME         CATEGOR      PRICE STOCK_QUANTITY
------- -------------------- ------- ---------- --------------
